

Project description

Challenge: Celgene, a major pharmaceutical corporation, needed cleanroom-quality flooring and wall coverings for an extensive upgrade and renovation.

Solution: Gerflor's deep product catalog met a variety of challenges on the project, with its state-of-the-art BioControl Performance cleanroom flooring and SPM wall coverings. GTI Control provided a heavy-duty, hygienic solution for large equipment and rolling loads. The installation was completed in record time, resulting in a high level of customer satisfaction.
