

Project description

Veeco is a market leader in micro-electronics and high-tech equipment. During a renovation to a large facility in New Jersey, they defined the need for a flooring solution that would be virtually indestructible, with heavy-duty capacity, and ease of installation. GTI MAX proved to be the solution to all their questions, and the installation was able to be accomplished with very little disruption to their ongoing operations.

Project Details

Facility

Veeco

Location

Somerset, NJ

Material

GTI MAX

Colors

0252 Titanium

Size

31,000 SF

Proudly Installed By

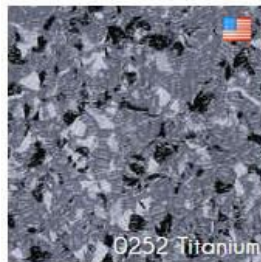

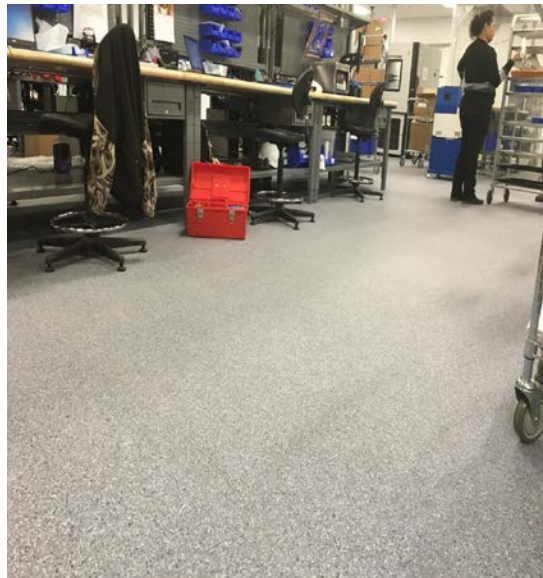

Consolidated Carpet
2016
